Foreword

In 2021, the Fundação Getulio Vargas’s Sao Paulo School of Business Administration (FGV EAESP) was assessed through the Business School Impact System (BSIS) according to 120 indicators. The FGV EAESP was the first in Latin America to receive international recognition for its impact on society.

Subsequent to this new certification, FGV EAESP established an Impact Management Department, aimed at promoting, evaluating and communicating the impact generated by the School.

This yearbook presents FGV EAESP’s main impact indicators in three dimensions:

- **Scientific**, related to its contributions to science published in top international journals;
- **Practical**, related to its contributions to companies, organizations, the government, public policy, and society in general, aiming at sustainable development; and
- **Educational**, related to the training of highly-skilled professionals to work in organizations, including in teaching and research institutions.

The general coordination of the editorial project fell to Gisele Gaia, supported by Daniela Mansour Magalhães da Silveira, Denise Francisco Cândido, Ilda Fontes and Juliana dos Anjos Martins, and the graphic design was carried out by designer Cris Tassi.

The preparation of this report was supported by the following areas: Alumni, Admissions Office, Institutional Evaluation Coordination Office (CAVIN), Career Center, Coordination offices for undergraduate, executive graduate and academic graduate programs, Diversity Coordination, Operations Office (DO) and Center for the Development of Teaching and Learning (CEDEA).

Sincerely,

**Thomaz Wood Jr.**

*Coordinator – FGV EAESP Research & Publications*
FGV EAESP impact map

FGV EAESP has a dual knowledge generation structure which are disseminated through six “channels” and generate three types of impact.

### Developing Four Main Knowledge Products
- Scientific papers
- Books and Book chapters
- Master theses and Ph.D. dissertations
- Technical reports

### Which Are Disseminated Through Six “Channels”
- Undergraduate programs
- Executive programs
- Graduate programs
- Advisory services
- Events
- Journals and media

### And Generate Three Types of Impact
- **Scientific**
  - Contribution to knowledge in management
- **Practical**
  - Contribution to sustainable development
- **Educational**
  - Contribution to the education of citizens and leaders

In 10 years, the publication of scientific papers in Brazil and abroad has shown positive development.

Publication of papers abroad grew significantly, gradually moving to journals with a higher impact factor, from a level of 1,000 in the early 2010s to almost 3,500 in the early 2020s.

Note: Until 2020, the production of professors linked to the Applied Research Centers of academic programs and Applied Study Centers was used as the basis, whereas, in 2021, the production of all Full-time faculty was considered.

ARTICLE
To err is human: Exploratory multilevel analysis of supply chain delivery delays
DOI: https://doi.org/10.1002/joom.1154

AUTHORS
Amrou Awaysheh, Markham T. Frohlich, Barbara Bechler Flynn, Patrick J. Flynn

JOURNAL
ABSTRACT

We examine the impact of human errors by front-line supply chain employees on delivery delays. We build on normal accident theory (NAT), a multilevel theory describing the relationship between a firm’s latent conditions (systemic managerial, technology, and social factors) and human errors. Latent conditions can have the unintended consequence of intensifying the impact of a human error, thus, we hypothesize a moderating effect of latent conditions on the relationship between errors and delivery delays. Hypotheses are tested using archival shipment data provided by a Fortune 500 company and archival carrier violations data. A multilevel design, with 299,399 shipments (level 1) nested within 97 carriers (level 2), was tested using mixed effects regression modeling. The results indicated that both dispatcher and driver errors were related to the probability of a late delivery, and that dispatcher errors were associated with longer delays. The moderating effects of several carrier latent conditions were significant and positive, indicating that both types of errors were more strongly associated with the likelihood of late delivery and that dispatcher errors were associated with longer delays when moderated by carrier latent conditions. The results are discussed from the perspective of NAT and technology management, developing prescriptions, and suggesting opportunities for future research.

ARTICLE
Recentering the global south in the making of business school histories: Dependency ambiguity in action
DOI: https://doi.org/10.5465/amle.2020.0156

AUTHORS
Sérgio Wanderley, Rafael Alcadipani, Amon Barros

JOURNAL
Academy of Management Learning & Education, v. 20, p. 361-381, 2021
ABSTRACT

The histories of Business Schools (BS) are usually produced from U.S.-centric perspectives. Seeking to recenter the Global South in the making of these histories, this paper aims to analyze the history of BS in Brazil via dependency studies. Dependency is the condition of a hierarchical relationship between two or more economies that become entangled for the benefit of the richer countries. Dependency studies aim to examine dependent conditions prevailing since colonial times to overcome them. We analyze the creation and dissemination of five BS from 1937 to 1961, a period marked by the emergence of the first undergraduate courses in the field and a heavy push towards industrial development in the country. We argue that dependency macro factors were the main drivers behind the creation, implementation, and dissemination of BS in Brazil. We posit local agents performed dependency ambiguity, that is, exploring context drivers within the Brazilian technological-industrial dependency and seeking external support to establish early BS in the country. We claim that through dependency lenses we can reposition the narratives about the development of BS in the Global South away from a U.S.-centric explanation, emphasizing the role of local contextual factors and actors within Global South countries dependency longue durée.

ARTICLE
When helping hurts: Covid-19 critical incident involvement and resource depletion in health care workers
DOI: https://doi.org/10.1037/apl0000850

AUTHORS
Miguel Pinto Caldas, Kathryn Ostermeier, Danielle Cooper

JOURNAL
ABSTRACT

A focus on helping others is generally lauded, particularly in medicine, but in the context of a pandemic when health care professionals are facing increased risk, loss, and trauma, this focus can potentially be detrimental. In this study, we sought to (a) examine if health care workers intensely involved in the coronavirus 2019 (COVID-19) pandemic are experiencing negative psychological and emotional outcomes, and (b) investigate if helping related factors (prosocial motivation and perceived prosocial impact) exacerbate and mitigate relationships to negative outcomes in a crisis situation. Using data collected from doctors and nurses before and during the COVID-19 pandemic, we examine the relationship between intensity of involvement in the COVID-19 pandemic response and emotional exhaustion and depression, as well as the moderating effects of prosocial motivation and perceived prosocial impact. Data was collected at three time points (T1 and T2 pre-pandemic, and T3 during COVID-19), with prosocial motivation and controls collected at T1/T2 and predictors and outcomes collected during the pandemic. We find that intensity of involvement does associate with emotional exhaustion at work and that higher prosocial motivation exacerbates this relationship. Supplemental analyses suggest that the exposure to self-dimension of involvement is positively associated with emotional exhaustion and depression. Understanding the roles of prosocial motivation and prosocial impact in managing regulatory resources has important ramifications for health care workers on the frontlines of health crises responses, as these resources are necessary to manage the associated trauma.

Exposing the unfinished business of building public administration in late democracies: Lessons from the COVID-19 response in Brazil

DOI: https://doi.org/10.1111/puar.13415

AUTHORS
José Antônio Puppim de Oliveira, Evan M. Berman

JOURNAL
Public Administration Review, v. 81, p. 1183-1191, 2021
ABSTRACT

The COVID-19 pandemic has exposed fundamental flaws in the design of public administration in late democracies. While much writing to date focuses on the initial and vital responses to COVID-19, the magnitude of this event also furthers insights into the risks of incomplete institutional designs and practices, such as the case of Brazil, an example of the administrative flaws in late democracies. This article is not a critique of responses to COVID-19 per se, but an examination of these considering democratization processes that include state-building and the need for another push in administrative and political reforms. Shortcomings in state-building, which existed before COVID-19, inflict heavy costs on society and, if left unaddressed, add to the costs of future disasters and unraveling of support for state and democratic institutions.

Distribution effectiveness through full- and self-service channels under economic fluctuations in an emerging market
DOI: https://doi.org/10.1016/j.jretai.2021.05.002

AUTHORS
Leandro Angotti Guissoni, Jonny Mateus Rodrigues, Felipe Zambaldi, Marcos Fava Neves

JOURNAL
Journal of Retailing, v. 97, p. 545-560, 2021
ABSTRACT
Retail distribution is one of the major challenges in emerging economies. These economies are volatile and filled with inefficiencies, and the representativeness of unstructured retail increases the complexity of distribution systems for consumer packaged-goods companies. We analyze 644 brands to extend the existing literature by modeling the retail distribution and market share in an emerging market according to the type of retail channel (full- and self-service channels), moderated by economic fluctuations and the market position of a brand (high- and low-share brands). Our model controls for endogeneity using instrumental variables (IVs) and accommodates heterogeneity across brands and categories by means of a fixed-effects robust regression. Our study highlights that the relationship between distribution and market share exhibits greater convexity in the self-service channel than in the full-service channel. Further, we contribute to the existing research in distribution effectiveness in emerging markets by showing the convex effect of distribution on market share could vary when the economy changes. Distribution gains are more effective in the self-service channel than in the full-service channel in times of economic decline. Also, the results indicate the higher degree of convexity in the relationship between distribution and market share for the self-service channel compared with the full-service channel is increased further for high-share brands than for low-share brands.

Institutional vulnerability and trust in public agencies: Views from both sides of the street

DOI: https://doi.org/10.1111/gove.12574

AUTHORS
Gabriela Spanghero Lotta, Peter Spink, Fernando Burgos Santos

JOURNAL
ABSTRACT

This article seeks to contribute to the discussion of the dynamics of trust in street-level public sector work, especially in settings where relationships between agencies, frontline workers, and society are fragile. Data was gathered in different vulnerable areas of the city of São Paulo, Brazil using interviews with frontline workers and complemented with field notes from a five-year longitudinal study in one high-density area with a history of violence. Concern was to understand how, despite a lack of reciprocal trust, citizens and service providers create ways of meeting daily demands and how, in doing so, they see each other. Results show that in vulnerable settings, issues of inter-agency cooperation and territorial connectivity between different public sector services can be more important than individual agency performance in helping citizens find solutions to the problems they are facing. In the absence of an effective inter-institutional framework, trust is quickly eroded.

ARTICLE
Public management reform in Brazil (2002-2019)
DOI: https://doi.org/10.1080/14719037.2020.1752037

AUTHORS
Ricardo C. Gomes, Erika de Farias Lisboa

JOURNAL
Public Management Review, v. 23, p. 159-167, 2021
ABSTRACT

Since the end of the military period ahead of the Brazilian government in 1985, Brazil has had eight presidents swinging from lefts- and right-wing political orientations. The political direction turned from the right (Sarney and Collor 1985–1992) to the centre (Fernando Henrique 1994–2002) to the left (Lula and Dilma 2003–2016), and back to the right (Bolsonaro 2019–). Despite political orientation differences, all of them made (Bolsonaro is still making) some administrative reforms. In this paper, we present a historical line of such changes and the impact upon public management theory.

Leaders affect business creation: Evidence from mayoral elections

DOI: https://doi.org/10.1016/j.leaqua.2021.101577

AUTHORS
Paulo Arvate, Joana Sabrina Pereira Story

JOURNAL
Leadership Quarterly, v. 1, p. 101577-101578, 2021
ABSTRACT

Research into leadership has consistently associated leaders with follower outcomes, such as motivation, satisfaction, and individual performance. However, only a few studies have looked at the impact of leadership on economic outcomes. In this study we test the effect of leaders’ political ideology (an identifiable leadership preference) on economic outcomes (private and public business creation). By using a combination of a quasi-electoral experiment (mixed-ideological election in which the margin of victory is close to zero) and a regression discontinuity methodology, we tested whether right-wing mayors would see more private business created (as aligned with party objectives) than left-wing mayors during their tenure. We also tested whether left-wing mayors would see more public organizations created (as being aligned with party objectives) than right-wing mayors during their tenure. Based on a sample of over 400,000 new firms in over 3,155 Brazilian municipalities, we confirmed our hypothesis for right-wing mayors only. Moreover, we found some evidence that the most likely mechanism used by right-wing leaders to produce this result is the development of actions related to business incubation (a place for the development of startups). The implications for future research and the study’s important theoretical and practical contributions are discussed.

The politics of COVID-19 vaccination in middle-income countries: Lessons from Brazil
DOI: https://doi.org/10.1016/j.socscimed.2021.114093

AUTHORS
Elize Massard da Fonseca, Kenneth C. Shadlen, Francisco Inácio Bastos

JOURNAL
Social Science & Medicine, v. 281, p. 114093, 2021
ABSTRACT

As the world struggles to meet the challenges of vaccination against COVID-19, more attention needs to be paid to issues faced by countries at different income levels. Middle-income countries (MICs) typically lack the resources and regulatory capacities to pursue strategies that wealthier countries do, but they also face different sets of challenges and opportunities than low-income countries (LICs). We focus on three dimensions of vaccination: procurement and production; regulation of marketing registration; and distribution and uptake. For each dimension we show the distinct challenges and opportunities faced by MICs. We illustrate these challenges and opportunities with the case of Brazil, showing how each dimension has been affected by intense political conflicts. Brazil’s procurement and production strategy, which builds on a long trajectory of local production and technology transfer, has been riddled by conflicts between the national government and state governments. The regulatory approval process, based around one of Latin America’s most highly regarded regulatory authorities, has also been subject to acute inter- and intra-governmental conflicts. And with regard to distribution and uptake, in the face of high uncertainty, even with a solid health infrastructure, Brazil encounters difficulties in promoting vaccine delivery. The research also reveals the importance of coordination among these dimensions, in Brazil and beyond. Pandemic preparedness and response must include sharing knowledge of how to produce vaccines and recognition of the crucial linkages between procurement, regulation, delivery, and uptake that are necessary for ensuring access to these products.

Working through the fog of a pandemic: Street-level policy entrepreneurship in times of crises

DOI: https://doi.org/10.1111/padm.12745

AUTHORS
Anat Gofen, Gabriela Spanghero Lotta, Marcelo Marquesini da Costa

JOURNAL
ABSTRACT
Imposing significant challenges for both street-level implementation and policy (re)design, crises alter the environment for street-level policy entrepreneurship (SLPE), wherein street-level bureaucrats engage in policy formulation processes to secure future policy outcomes. Nevertheless, like street-level implementation in general, SLPE is studied during ordinary times but rarely during crises. Focusing on community-health workers in Brazil during the Covid-19 crisis uncovered a defensive motivation for SLPE, which aimed to legitimize community healthcare as an integral part of pandemic treatment, reforming the government’s hitherto neglectful approach to community health services. Moreover, the continuing crisis created an unusually prolonged window of opportunity for securing community healthcare provision. By utilizing collective efforts and drawing on powerful politicians’ mobilization, SLPE during crisis shares similarities with, yet differs from, SLPE during ordinary times, while further closing the interstices between local, professional, and political perspectives in the formulation of policy decisions.

Impact Blog

The Impact Blog is an initiative of FGV EAESP to disseminate the knowledge produced in the institution.

- **150 posts made in 2021**
- **16,000 hits**
- **More than 9,000 visitors**

Most accessed posts

1. **When imagining the next 20 years of the Brazilian automobile industry, an analysis points out that the transition to electric vehicles will be slow**

   Have you stopped to think about the transformations that the Brazilian automobile industry must undergo in the coming years? José Carlos D’Andrea Mateus, a master’s degree candidate at FGV EAESP, did this exercise and made interesting analyzes.

   Read the [post](#) and the [full study](#).

2. **Small hospitals, which are the majority in Brazil, could be enlarged to guarantee a higher return to the health system**

   Many countries have adapted their health policies so as to focus attention on larger hospitals, with more than 200 beds, which find it easier to achieve an economy of scale and to maintain their economic and financial sustainability. However, most hospitals in Brazil are units with fewer than 50 beds, the very type that usually faces the problem of low efficiency.

Digital exclusion affected access to emergency aid during the pandemic, especially for classes D and E

Many Brazilians were unable to receive the emergency aid offered during the Covid-19 pandemic due to digital exclusion, as revealed in a study by the Center for Microfinance and Financial Inclusion Studies of the Getulio Vargas Foundation (FGVcemif).

Game dynamics can yield good results for organizations in terms of productivity, learning and autonomy

A study by FGV EAESP researchers has shown that gamification drives good results in three dimensions in organizations: organizational, team, and individual.

Right-wing populism has influenced education policies, which may undermine inclusive education and diversity

Researchers monitoring education policies have found a specific type of right-wing populism that is driven by an alliance between the movements School Without Party (Escola Sem Partido) and Evangelical Parliamentary Front (Frente Parlamentar Evangélica), which has influenced public education policies during the past decade.

PRACTICAL IMPACT

Impactful projects
Impactful projects

FGVces Sustainability Studies Center

Brazilian GGE Protocol Program

Project leader: Guilherme Borba Lefèvre

Objective
Foster the creation of inventories of greenhouse gas emissions (GGE), through workshops and publications adapted to the Brazilian context.

Practical impact
- 74 people were trained in the Brazilian GGE Protocol Program method for the preparation of corporate emission inventories.
- The program calculation tool has been downloaded over 3,000 times.
- 192 companies have published their emission inventories (2020) on the online program platform, Public Emissions Record.
- The program’s annual event, in which the publication of 473 corporate inventories was celebrated, was attended by 477 participants.
- The project information can be accessed via this link.
Impactful projects

FGVces Sustainability Studies Center

Diagnosis, impact evaluation and valuation of the socioeconomic damage caused to the communities by the collapse of the Fundão Dam

*Project leader:* Mário Prestes Monzoni Neto

**Objective**
Conduct research along the Rio Doce basin for full reparation of the disaster damage through interdisciplinary action involving experts from various knowledge fields.

**Reach of the impact**
- The work is a record of the history of the disaster, with substantial documentation of the reality, expressed by those who experienced the consequences.
- The data and information collected instrumentalize several actors in the process, including the very people who had been affected, in the conquest of rights.
- The analyses generated aid for the justice institutions to prepare measures seeking full reparation of the damage suffered by the population.
Impactful projects

FGVcnd New Developmentalism Studies Center

The trend towards cyclical overvaluation of the currency exchange rates and their relationship with the investment rate and structural change in Latin American countries

Project leader: Luiz Carlos Bresser Pereira

Objective
Answer two central questions regarding financial stability and economic development: first, if there is a trend towards cyclical, chronic exchange rates in Latin America; and, second, in case of an affirmative response, if the exchange rate becomes a determinant variable of the investment rate.

Potential impact
- The new criterion suggested to estimate currency exchange misalignments may assist analysis and formulation of macroeconomic policies.
Impactful projects

FGVceapg Public Administration and Government Studies Center

Latin America Regional Development Index (Idere Latam)

Project leader: Eduardo José Grin

Objective
Create a system of indicators to measure territorial development and allow analysis of trajectories and asymmetries of dimensions considered critical for human development, grouped according to regions (states, provinces or departments), the aim being to identify existing gaps and territorial inequalities.

Impact
- Construction of a system of regional development indicators structured in 10 dimensions (health, education, public safety, race, gender, institutions, economics, environment, infrastructure and well-being), allowing regional development managers a broader view in order to aid formulation and implementation of public policies.
- Project information can be accessed through the following: [website](#)
Impactful projects

FGVcelog Excellence in Logistics and Supply Chain Center

Analysis of changes in international production chains and the potential impacts on Brazil

Project leader: Orlando Cattini Junior

Objective
Identify the potential impacts on Brazil of changes in international production chains due to the Covid-19 pandemic.

Impact
- Research evidenced "V" standard international production chains, with sudden reduction caused by the Covid-19 pandemic, followed by rapid recovery.
- Research also revealed low participation of Brazil in global manufacturing chains, an indication of growth opportunities based on innovation, infrastructure improvement and export support.
- Project information can be accessed via this link.
Sustainable development objectives are related to a global appeal for action to end poverty, protect the environment and climate, and ensure that people everywhere can enjoy peace and prosperity.

FGV EAESP actively contributes through internal publications, programs and actions.
Objective 1

Eradication of poverty

End poverty in all its forms, everywhere

Authors: Lauro Gonzalez, Fernanda Lima-Silva, Marlei Pozzebon
DOI: https://doi.org/10.1177/23996544211041119
Objective 2

Zero hunger and sustainable agriculture

End hunger, achieve food security and improved nutrition, as well as to promote sustainable agriculture

APPLIED RESEARCH

- Put it on the Table Project - FGVces Sustainability Studies Center
- Conducted in partnership with Citi and sponsored by Citi Foundation
- The initiative seeks to include family farming in the food chain in large urban centers, taking into consideration fair trade, environmental conservation, and food and nutritional security.

Women entrepreneurs in a male-dominated environment: Leading high-tech startups in Brazil
Authors: Vânia Nassif, Marcos Hashimoto, Cândido Borges, Tales Andreassi
Journal: Humanidades & Inovação, v. 8, p. 10-23, 2021
Objective 6

**Clean water and sanitation**

Ensure the availability and sustainable management of water and sanitation for all

Objective 7

**Clean affordable energy**

Ensure affordable access to modern, reliable, sustainable energy for all

**INTERNAL PROCESSES**

- Planning of all cleaning and gardening procedures, aiming at optimizing water consumption
- Use of "smart" equipment to minimize consumption
- Execution of preventive maintenance plans for equipment related to the use of water and electricity
- Systematic replacement of equipment, aiming at reduced consumption

**APPLIED RESEARCH**

**Project water that unites us**

**Objective**: promote the corporate water management through the hydric footprint and life cycle approach

**Leader**: FGVces Sustainability Studies Center

**Financial support**: Swiss Agency for Development and Cooperation (Cosude)

Individual resilience, pleasure, and suffering at work and organizational links: Reflections and perspectives of research for the public sector

Authors: Fabio Faiad Bottini, Kely César Martins de Paiva, Ricardo Corrêa Gomes
Journal: Cadernos EBAPE.BR, v. 19, n. 1, p. 45-57, 2021
DOI: https://doi.org/10.1590/1679-395120200091
Objective 9

Industry, innovation and infrastructure

Build resilient infrastructure, promote inclusive, sustainable industrialization and foster innovation

RESEARCH PROJECT

Enaction: A São Paulo innovation hub
The project studies the management of innovation networks and the development of a platform supporting the approach of São Paulo science and technology institutions to the productive, public and civil sectors
Leader: Luciana Harumi Hashiba Mestrelli Horta - FGVin Innovation Center

APPLIED RESEARCH

The digital economy and innovation project in multinational companies
Objective: To study the development stage of Brazil-based multinational companies in terms of the digital economy and their engagement in the Brazilian innovation ecosystem.
Leader: Maria Tereza Leme Fleury - FGVci Center for Studies in International Competitiveness.
Impact: Digital maturity positively affects the management system of Brazil-based multinational companies. They make more agile decisions and are closer to local employees and their subsidiaries worldwide. They better understand customer needs and improve their relationship with their suppliers. In addition, they are more aware of the local community and act better. The same occurs in the innovation ecosystem.

Objective 11

**Sustainable cities and communities**

Make cities and other settlements inclusive, safe and secure, resilient and sustainable

**APPLIED RESEARCH**

The development of electronic government: Application of the U.N. local electronic service index to Brazilian cities

**Objective:** to measure the presence of municipalities on Internet through 87 indicators related to four dimensions: technology; content provision; service provision; and participation / engagement.

**Leader:** Maria Alexandra Cunha – FGVceapg Center for Studies of Public Administration and Government.

**Support:** United Nations University, Operating Unit on Policy-Driven Electronic Governance (UNU-Egov); and the Regional Study Center for the Development of the Information Society Center (Cetic.br) of the Ponto BR Information and Coordination Center (NIC.br).

Mobility of the future: A disruptive model for São José dos Campos

**Objective:** make a complete diagnosis of the urban mobility conditions of the city of São José dos Campos, and propose a new public transportation system, incorporating “mobility as a service” and transcending current conventional models.

**Leader:** Ciro Biderman - FGVcepesp Public Sector Politics and Economics Study Center.

Practical manual for innovation in urban solid waste management

**Objective:** contribute to eradication of dumps and increase waste reuse by screening, recycling and compostation.

**Leader:** Michel Xocaira Paes - FGVceisa Center for Infrastructure Studies and Environmental Solutions

  - University of St. Gallen
EDUCATIONAL IMPACT

Alumni with prominent careers
Personal trajectories
Alumni with prominent careers

**Aécio Luis Pickler Pacheco** graduated in Mechanical Engineering from the Santa Catarina Federal University in 2013. From 2014 to 2017, he worked at Paranapanema. He then moved to Takao do Brasil, initially as Market Intelligence and Pricing Coordinator, and, in 2019, he was promoted to Market Intelligence and Pricing Manager. He attended the CEAG course from 2018 to 2020. In 2021 he received an invitation to become the Cargill Strategic Pricing Manager for South America.

**David Martins Zini** was already a senior professional with broad corporate experience when he joined MPA, working as a commercial director of Ouro Verde, one of the largest commercial fleet leasing companies in Brazil. During the course, he developed a series of works discussing the impacts of technology on the sector (his dissertation theme too), which led him to found a startup in the mobility area. Upon completion of the MPA, he became a professor lecturing in the Fundação Dom Cabral executive courses.

**Fábio Antonio de Medeiros** joined MPA as Executive Director of the Avon supply chain in Brazil. His dissertation on the use of distribution chain improvement techniques without capital investment contributed to the implementation of several advances in the company, which caught the attention of the global management and competitors. Thus, in 2019, he was promoted to Supply Chain Vice President in the Northern Region of Latin America, and, in 2020, he moved to Natura & Co. as Executive Director of the supply chain covering the whole of Hispanic Latin America.

**Julianna Alves Mendes** graduated in Civil Engineering from Tiradentes University Center (UNIT), in 2018, along with a double diploma awarded by the Universidad de Burgos (Spain). Then she attended the MBM. In 2019, she started working at Loft (real estate company), assuming the posts of Account Manageress, Senior Sales Account Manageress and Top Brokers Sales Manageress.

**Julianna Alves Mendes**
**Personal trajectories**

**Luís Augusto Castex** arrived at MPGC as director of operations at Total Express, one of the largest companies in e-commerce logistics in Brazil. After the course, in July 2020, he received an invitation to occupy the position of COO in Tópico, the country’s largest company in flexible infrastructure.

**Marcos Jorge Damasceno** specialized in the software area, sought MPA to develop management skills that could expand his career horizon in Micro Focus, a consultancy dedicated to the segment. Throughout the course, he sought analysis tools and studied business strategies in his sector, which led to his transfer to a company branch in Canada. In that country, he took over a Google business area.

**Marcelo Martins de Sá** was awarded a PhD in Business Administration. Afterwards he became an academic coordinator at Saint Paul Business School. In 2020, he took a position as a lecturer at Northumbria University, Newcastle-upon-Tyne, England. In Brazil, he continues to pursue his research field and to work as a guest lecturer of the Master’s and Doctorate course in Production Engineering at UFSCar.

**Maria Carolina Zanette** holds a PhD in business administration. She was a visiting researcher at Università Commerciale Luigi Bocconi, Italy. In Brazil, she worked as a lecturer in several institutions. In 2017, she started to work as an assistant lecturer and director of the International Bachelor Degree in Business Administration at ESLSCA Business School in Paris. In 2019, she joined Neoma Business School as an assistant lecturer and coordinator of the Master’s in Digital Marketing.
**Personal trajectories**

**Mariana Miki Tanaka** graduated in Mechanical Production Engineering from the Mauá School of Engineering in 2011. She worked from 2011 to 2018 at Raizen and NovaAgri. She attended CEAG between 2018 and 2020. During the course, in 2018, she moved to InterCement, initially as a senior logistics analyst and later as a logistics coordinator. In 2021, she was promoted to the freight contracting manageress.

**Marina Rangel de Almeida e Silva** graduated in Biomedicine from the Methodist University of São Paulo in 2011. She studied for her Master’s in Molecular Biology at UNIFESP from 2012 to 2014. She graduated in Pharmacy at the FMU FIM-FAAM University Center in 2016. She worked from 2015 to 2018 at Bayer. In 2019, she moved to Eurofarma to work as a Latam marketing coordinator. From 2020 to 2021, she attended the MBM. Soon after finishing the course, she was promoted to Latam product manageress.

**Morgana Gertrudes Martins Krieger** holds a PhD in Public Administration. She was a visiting researcher at the London School of Economics and Political Science (LSE), sponsored by a Capes-PDSE scholarship. She has extensive experience in the field of civil society organizations, working in various organizations and on social projects, such as: Rede Tekoha, Instituto Nossa Ilhéus, Saúde Criança and Aiesc. She is currently a professor at the School of Administration at Bahia Federal University, and her research covers areas of urban conflict, hegemony and street level bureaucracy.
**Sergio Almeida Xavier Brito** has had a career spanning over 30 years in the technology area (was IBM Vice President), and opted for MPA to prepare for a second career as a consultant. Throughout the course, he developed topics related to business strategy, and his interest in corporate governance led him to direct his research to the impact of administrative boards on the stimulation of innovation within organizations. This work has driven his performance as a consultant and advisor, as well as his involvement with the startup technology ecosystem. In addition to consulting projects and his participation on administrative boards, he is a member of GVangels, an angel-investor group formed by FGV alumni as an investor himself and as mentor of companies that have invested.

**Thiago Godoy** arrived at MPGC after studying for his MBA. He graduated from the University of British Columbia. He joined as coordinator of resource mobilization and relations with the administration of the Brazilian Financial Education Association. Soon after MPGC, he received an invitation to be appointed as the Head of XP Financial Education. He points out that the broad vision of sustainability acquired in the course proved fundamental to the prominent position he occupies in XP today.
